SATHAPANA BANK

Cloud Solution Architect

Based in Phnom Penh, Cambodia.

Responsibilities

- Coordinate functional and nonfunctional requirements, security requirements and data classifications
- Define cloud solution architecture to include evaluation, selection and integration of vital technical components that realize the defined functional, non-functional and security requirements
- Drive vision and cloud first architectural strategies with leadership team implementing industry best practices, processes, and methodologies
- Lead and implement cloud foundation build and cloud migration
- Lead the discussion with stakeholders for Cloud Engagements including assessment, approval, migration planning, design, development, and solution workshops
- Lead the design and development of monitoring, reporting, alerting, and analytics focused on ensuring resiliency and proactive alerting for cloud-based applications
- Lead and inspire cross-functional architects and engineers by fostering community and architectural mindset through mentorship and strategic technical direction
- Cooperate with stakeholders to become a trusted advisor on Digital Transformation journey
- Provide direction, mitigate risk, and offer solutions tailored for business needs
- Execute technology and operational excellence, establish metrics and process for assessment and improvements
- Be as point contact for all technical deliverables in complex cloud engagements (Assessment, Migration, Modernization etc.,)

Qualifications

- Bachelor's degree in Management Information System, Computer Science, Business Administration, or other related fields
- At least 5 to 10 years' professional experiences with relevant responsibilities as above
- Knowledge of cloud solutions such as AWS, OCI and Azure
- Proven ability to configure and support cloud infrastructure
- Knowledge of microservice and cloud native designs to specify modern applications for development
- Good at English and Microsoft Office (Words, Excel, and PowerPoint)
